Re: Proposed Lagoon – Pine Springs Landfill

Enclosed is a copy of a proposal from Grace & Associates for the construction of a sewage treatment facility to be constructed at the Pine Springs Landfill Site.

Council has accepted this proposal and associated estimated cost. Council is also directing Thomas Grace to commence the process (in accordance with all applicable legislation) to allow this project to become a reality if deemed feasible after all environmental studies suggest this area to be a suitable location.

As noted in the cost estimate, two public information meetings will be held and any/all concerns will be considered at that time.

Future public meetings will be advertised in local papers and also will be posted on our website at www.algonquinhighlands.ca.
